WELCOME TO PRESTIGE...

Sometimes more is better.

For 2003, giving you more is what the Ibanez line is all about. There has never been an Ibanez line with a wider range of models, features, styles and sounds than this one. We're not kidding. Just take a look at the variety of new hardware, new figured woods and hi-tech finishes, new electronics, new necks - you name it. 2002 was a great year for new Ibanez guitars. But 2003 is huge.

And sometimes less is better.

Especially when you're talking bucks versus bang. At Ibanez, our instruments have always been known for having the most favorable bang-for-the-buck ratio. Never has this been more true than in 2003. If you thought you were going to have to settle for something less than an Ibanez, think again. Check out the 2003 line, then head to your Ibanez retailer and see just how much can be yours for how little.

Prestige

GUITARS

Prestige

ENHANCED PLAYABILITY, SUPERIOR TONE...

Ever pick up a guitar that just felt right straight off the rack? Sometimes it's not accidental. With the Prestige series of guitars, the Ibanez R&D team spent some serious time figuring out the magical qualities of those guitars. It's not just the sound, or just the feel or look – It's a combination of those things. And with the Prestige series, you will not only find guitars with the right combination of features, but each guitar will feel just like an old friend as soon as you pick it up.

The key element is the finishing of the neck and fingerboard. We've taken extra care in this area to ensure that all of the Prestige guitars have a unique final finish to give you that "broken in" feel right off the bat. Pick up a Prestige guitar and feel it for yourself.

All Prestige guitars feature specially treated necks and fingerboards

All Prestige models have aluminum plate truss-rod covers.

STANDOUT STUFF – PRESTIGE RG

- DiMarzio® original pickups (RG3xxx models) and DiMarzio/IBZ custom pickups (RG2xxx models).
- Newly designed EDGE PRO double locking tremolo system.
- Aluminum truss rod covers on all Prestige models.
- High quality, hand selected materials.

RG series

The Prestige RGT3020 and RGT2020 are the flagships of the RG series. They both feature neck-through body construction and super detailed Japanese craftsmanship. The neck-through construction gives the guitar extra oomph, especially in sustain and volume. The RGT3020FM features a selected flame maple top while the RGT3020QM features a high quality quilted maple top.

RGT2020SOL

- Ultra neck-thru
- Mahogany wing body
- Jumbo frets
- Edge Pro bridge
- DiMarzio/IBZ-N (H) neck pu
- DiMarzio/IBZ-B (H) bridge pu
- color: SOL

Maple-Bubinga-Maple 5-piece Neck-thru construction on the RGT2020 model offers easier access and greater sustain.

RG series

For those into the classic RG vibe, the new RG Prestige bolt-on models also feature the new EDGE PRO tremolos and EDGE PRO tremolos with piezo pickups. There are various models available with or without pickguard, depending on how classic you want to go. Also, you have your choice of neck shapes, from the Ultra shape on the RG2620QM and RG2120X, to the standard Wizard shape on the RG3120, to the Super Wizard shape on the RG2570EX and RG2550EX.

- Jumbo frets
- Double Edge Pro bridge with piezos
- DiMarzio/IBZ-N (H) neck pu
- DiMarzio/IBZ-B (H) bridge pu
- color: TLB

The newly designed EDGE PRO double locking tremolo allows easy access for changing strings without having to cut off the ball end.

The Toplok screws in from the top, eliminating the neck holes required for most locking nuts. This allows for greater mass at the guitar's most vulnerable point.

A specially designed neck heel featuring more mass, yet allowing for easy access.

Super low profile setup for easy playability.

RG2xxx models feature specially designed DiMarzio/IBZ pickups. These pickups are custom wired by DiMarzio specifically for Ibanez.

The Ibanez Double Edge combines the super-stable Edge Pro tremolo system with the superb piezo technology of L.R. Baggs®. Axes equipped with the Ibanez Double Edge can cut both ways, with the fire of an electric or the brilliance of an acoustic. New featured wiring gives players the ability to have electric and acoustic sounds at the same time.

The Roland® GK system, featured on the RG1520GK, gives the player total synthesizer control in a sleek package. For 2003, these models use special piezo pickups to drive the Roland® GK system. The piezo pickups provide the ultimate in accuracy when triggering a synth system.

RG1620XGK

R G series

What kind of music do you want to play? What kind of features do you need for your guitar?

The Ibanez RG line up responds to the wide variety of requests from musicians. If regular pickups don't cut it for you, how about an RG with a Roland® GK2 pickup? There are also RG 6-strings and 7-strings.

And if nothing is ever too low, there are models with the 27" scale XL neck that deftly handles all kinds of drop tunings. If you need an acoustic sound, the double EDGE PRO version adds piezo pickups to the bridge saddles that can replicate authentic acoustic tones.

With the RG line, you can create just about any type of sound.

in left hand model.

GRX series

For most rock players, having a guitar with only single coil pickups is well, kind of weak. And weak is what you could call most brands of affordable guitars. But with Ibanez, spending fewer bucks doesn't mean sacrificing tone. The Ibanez GRX guitars have the humbuckers that players need for heavy rhythms and soaring leads. To ensure all that great meaty tone is retained, all GRX guitars now feature the FAT-10 tremolo. Plus, you can choose from a wide assortment of cool finishes, so your axe looks as good as it sounds. And with the GRX series, you get the same set-up standards as our most expensive instruments. That's why our GRX guitars proudly display the Ibanez logo – not “by Ibanez” – on the headstock.

JEM

Thanks to a loyal legion of dedicated Steve Vai/JEM fans (an amazing number of whom are impressive guitarists in their own right), each JEM guitar becomes an almost instant collector's item. Why "almost?" Because Steve Vai and Ibanez designed his guitars to be so playable and capable of such a wide range of tones that they simply can't be left in the case.

STANDOUT STUFF — STEVE VAI MODELS

- Contoured basswood body (alder on JEM7V) with a 24-fret JEM neck provides easy access to all registers.
- Deep routed tremolo cavities allow the pitch to be lowered or raised by as much as a fifth.
- Prestige neck/fingerboard treatment finish (except JEM555).
- Vai's choice of specific DiMarzio® pickups for each model, combined with Ibanez Split-5 wiring for incredible tonal versatility.
- Universe — the guitar that ignited the 7-string revolution.
- Newly designed Ibanez EDGE PRO double locking tremolo (EDGE PRO II tremolo for JEM555).

EDGE PRO

EDGE PRO II

K-7

Props where props are due. Two of the biggest reasons for the resurgence of the 7-string in rock are Head and Munky of Korn. Ibanez proudly pays tribute to the dynamic duo with Ibanez's first co-signature models, the Korn K-7 7-string guitars. These rock machines come from the factory already tuned to the Korn "A" tuning and feature all kinds of Head and Munky inspired specs including DiMarzio® PAF-7™ pickups, the K-7 logo inlaid in the 12th fret AND glow-in-the-dark side dots. The unique U-bar trem system featured on the K-7 allows you to palm the bridge for trem effects without palming the fine tuners.

- Prestige treatment 25.5" scale PGM neck is 2mm thicker than our super-thin, super-fast Wizard necks.
- Newly designed Ibanez original EDGE PRO double locking tremolo.

EDGE PRO double locking tremolo

PGM

An artist possessing both style and speed, Paul Gilbert also turns a mean phrase in the language arts. So who better than Paul himself to describe his guitars: "When I pick up another brand of guitar, I have to think about so many things. The volume knob is always in the wrong place; the frets are too small; there are too many controls; the body shape pokes me in the ribs; the balance isn't right. Those are things I don't have to worry about with my Ibanez."

JS100WH

Newly designed Ibanez original, brand new EDGE PRO II tremolo for JS100.

JS

We can't think of a better tribute to the artist who has done so much for Ibanez and instrumental rock than - what else - a new Ibanez instrument.

With Joe Satriani guitars, the last word is always tone. This is why the crowning touch on the JS2000 is the FX EDGE Bridge. A real break-through in bridge technology, the FX Edge combines the unchallenged tuning stability of the Ibanez EDGE double locking design, with the full tone and sustain of a fixed bridge. The other 2003 JS models feature the new EDGE PRO or EDGE PRO II tremolos. NOW you really can have it all.

EDR series

With its innovative 3-dimensional body shape, the EDR guitar fits around the body for excellent playability and comfort. Equipped with an H-S-H pickup configuration, the EDR is capable of producing screaming lead guitar tones and liquid rhythm guitar sounds with the simple flick of the switch. The EDR guitar is truly an instrument with no boundaries.

New Designed Bridges

For 2003, Ibanez proudly introduces two new locking bridges: The EDGE PRO and the EDGE PRO II. Ibanez introduced the original LO-PRO EDGE in the nineties. The LO-PRO EDGE quickly became the standard by which all other locking tremolos were judged. The Ibanez R&D team has completed the next evolutionary step of the EDGE tremolo line this year with the introduction of the EDGE PRO and EDGE PRO II.

EDGE PRO

SLIDING STRING HOLDER

One of the biggest complaints about the ordinary locking tremolo was that the string holder blocks were often lost while changing strings. The EDGE PRO's and EDGE PRO II's SLIDING STRING HOLDERS are actually part of the bridge and will not drop from the saddle units.

Easy string changing

No need to cut off the ball end of your strings.

SOUND METAL CHIP

The EDGE PRO features a unique SOUND METAL CHIP on each saddle. The SOUND METAL CHIP helps to increase sustain right at the most critical area – the intonation point.

Intonation stability when using fine tuners

Unlike older style locking tremolos, the EDGE PRO and EDGE PRO II feature a STATIONARY STRING SUPPORT SYSTEM that will never change the intonation when using fine tuners.

Arm height and torque adjustment

The EDGE PRO II features two screws in the arm pocket, which allow for easy adjustment of the arm height and torque.

EDGE PRO II

Prestige

Not only do the S Prestige guitars feature the specially treated necks and fingerboards, they also feature a custom 12th fret inlay, only available on the S Prestige. If comfort is your thing, you can't get any more luxurious than a sleek S body combined with the ultra comfortable Prestige neck.

All Prestige guitars feature specially treated necks and fingerboards

All Prestige S models have custom 12th fret inlay.

S series

The most notable addition to the 2003 Prestige S is the new ZR double locking tremolo. The ZR tremolo is truly unique in concept and is the next advancement in double locking tremolo technology. The Prestige S with the ZR tremolo is truly the player's player guitar for today and for the future.

S series

Too much is not enough! The S series serves up a staggering number of choices that would be bewildering if they weren't all so cool. Now there's an S model to seduce just about anyone who isn't afraid to play something different. In tailpieces alone, the S offers a newly designed double locking tremolo called the ZR Tremolo. This tremolo features a ball bearing system, allowing for smoother arm control, especially when using the tremolo for vibrato effects. Another important feature is the ZERO POINT System, which forces the tremolo to return to its center point, therefore maintaining tuning stability. One thing hasn't changed though. The sexy and slender S is still thin around the edges to give you great comfort. That's why, 15 years after its debut, the sleek and slender S guitar can be found in every genre and playing environment.

S470DXBLM

STANDOUT STUFF — S GUITARS

- Big, heavy tone without the big, heavy body. Super-sleek S guitars provide complete playing freedom and comfort.
- Thin, fast and flat Wizard II necks allow effortless fretwork.
- New "ZR Tremolo" provides smooth tremolo action and outstanding tuning stability.

The new double locking ZR tremolo allows for smooth tremolo action, especially when using it for vibrato effects.

The new ZERO POINT System returns the bridge to a central point. This allows for greater tuning stability, especially when the player breaks a string.

New Designed Bridges

The ZR Tremolo is born from a totally different concept. Most floating tremolos use a knife-edge system, but the Ibanez R&D staff developed the ZR tremolo based on a ball bearing system. This gives the tremolo a more precise and smooth movement. The ZR tremolo finally takes the locking tremolo concept into a new exciting era.

ZR Tremolo

Ball bearing pivot

Smoother than ever! The ZR tremolo features a ball bearing pivot system, which allows the player ultra smooth arm control. With the precise movement of the ball bearing pivot, tuning stability is virtually guaranteed.

Offset saddle locking bolt

The saddle-locking bolt is off set from the center of the saddle, allowing easy access to the bolt without loosening the strings.

Arm torque adjuster

Simply adjust the arm torque by tightening or loosening the screw located in the arm holder.

ZERO POINT System

The ZERO POINT System returns the tremolo to the center point, thereby stabilizing the bridge. In addition to the usual tremolo springs, the ZERO POINT System has two additional springs, which force the bridge to return to the center point, thus insuring tuning stability.

Easy access for spring tension adjustment

Spring tension can be easily adjusted without removing the back plate.

Intonation adjustment screw

The ZR tremolo features a built in intonation adjustment screw. Just unscrew it from the baseplate and screw it into the bottom of each saddle for quick adjustment.

SA series

The everyman guitar.

Ibanez SA guitars are some of the most popular guitars in our entire line-up. Not only do they sound and feel great, they have the features that the gigging guitarist needs. One of those features is the SAT tremolo which allows the guitarist total control of their tremolo arm, without all of the problems associated with the usual non-locking tremolo bridge. With the addition of the DOUBLE SAT on the SA420X, SA players can now get those cool, natural acoustic guitar sounds with the built-in piezo pickups.

GSA series

Original Bridge

The SAT30 was designed with some real improvements in mind.

SAT 30

Easily adjustable string height

You can adjust string height simply by turning one screw on the saddle.

Saddle lock

SAT30 saddles can be locked with a screw. Once you adjust the intonation, it will not change. The saddles are firmly locked to the tremolo base for added sustain.

Arm torque adjustment screw

The arm torque can simply be adjusted with a small screw.

MMM

"Why a baritone? Because it goes to 11. With the baritone guitar's higher neck tension, I can tune down low and play with heavier strings and not have them feel like rubber bands. With a regular guitar, tuning down can become a real nightmare with the guitar going in and out of tune. But with my signature guitar, I can bite into it and play aggressively."

- Mike Mushok

There is nothing quite like neck-through construction for massive sustain and resonance. Just ask Mike. The Mike Mushok model features a specially designed bridge, which comes complete with a sustain block routed into the body. Needless to say, the bridge provides maximum sustain and supreme flexibility in intonation adjustment, allowing for the use of the massive string gauges with the large ball ends that Mike has been known to use.

SZ320BK

- SZ neck
- Maple solid top /Nato body
- Large frets
- Gibraltar III bridge
- SZ1 (H) neck pu
- SZ2 (H) bridge pu
- color: BK

STANDOUT STUFF — SZ GUITARS

- Thru-body staggered stringing compensates for different string gauges and tension and provides superior tonal balance, feel, articulation and sustain.
- 3 pc set in neck for better upper fret access and sustain.
- Quilted maple top and slightly thicker S mahogany body provide incredibly full sound with a wide range of overtones.
- New Gibraltar III bridge offers fixed bridge simplicity and sustain. No sharp edges for longer string life.

The new Ibanez Gibraltar III bridge is the logical evolution of the heralded Gibraltar bridge line. The Gibraltar III is designed for simple use and adjustment, allowing quick and easy access for adjusting intonation and string height.

The SZ series features set-in neck construction, allowing smooth access to upper frets.

The SZ series features string posts with uneven height, which insures proper tension balance.

AR series

One of the first original Ibanez designs, the Artist remains the most comfortable AND more affordable alternative to the other famous two-humbucker, set-in neck guitar.

At the top of the line is the ARTIST AR2000, with the Prestige fingerboard treatment that makes this new classic feel like a guitar that has been at home in your hands for years.

AX series

Keep It Simple! AX guitars were made for heavy rockers who just want to get out and do it without wasting time on unwanted bells and whistles. With AX guitars you've got everything you need (and nothing you don't) for heavy-duty modern rhythm and lead playing: a thick, one-piece maple neck, two humbuckers, a three-way switch and a mahogany body.

The Downshifter D-tuner is available on some models for a quick and simple down shift into the drop D zone.

NDM

"I like the idea of having something different. Duct tape is so much a part of what we musicians do on the road, especially in the van days when we couldn't afford to buy new equipment—just fix things with duct tape and hope that it helps. There were already lots of pretty guitars on the market that are very expensive, but aren't really "players."

But this is a real rugged, solid guitar that's also unique. Each one is individually wrapped, so every one is going to have its own "fingerprint". You're not going to find another guitar like it. And on top of all that, it's just an easy playing, versatile guitar that you can get a bunch of great sounds out of. I really am stoked with how this has all turned out".

ARTCORE

The Talman models feature an original body shape with a single "F" hole. Roughly the same size as a solid body guitar, the Talman has the sound of a semi-hollow guitar without ever making the player feel like he's playing one. The Talman is the ultimate live semi-acoustic guitar, for the adventurous guitarist.

ARTCORE

Artcore full acoustic guitars are the most unique of the series.

They possess all of the rich tones of traditional full-size models, but feature a refined body shape which accounts for their superb playability. These elements combined, make the Artcore full acoustic models perfect for a player seeking the sound of a full acoustic guitar for any musical application. Semi acoustic guitars have been the choice of many guitarists over the years for their singing lead guitar qualities, and their thick rhythm guitar tones. The AS models follow in that tradition with their classic shape and look. The AM models are downsized versions of the AS guitar, offering the tone of the traditional semi-acoustic in a more comfortable body size. The AM models are also offered with tremolo units.

GB

Back in the mid-70's, virtuoso George Benson had a vision of the cutting edge features a jazz guitar would need to survive in the world of amplification. The result was his GB10, a jazz guitar for the modern world. New generations of cutting edge jazz guitarists continue to record and perform with the GB, unimpeachable testimony that the GB is still a jazz guitar for the today's world. Anytime, anywhere and at any volume.

STANDOUT STUFF — GEORGE BENSON MODELS

- Pure jazz tone at any volume.
- Floating pickups, a thicker top and a smaller body reject feedback (GB10, GB100).
- Special ebony bridge completely transfers the tone from the strings to the top.
- Die-cast tailpiece allows separate tension adjustment of treble and bass strings (GB10, GB100).
- Prestige treatment on the neck and fingerboard.

STANDOUT STUFF — JOHN SCOFIELD MODEL

- Succeeds the AS200 with designs and features ordained by the AS200's most famous player.
- Original AS/AR style headstock for better balance.
- Gotoh 510 machines, Super 58 pickups and untraditional side output jack.
- Classic Ibanez half-brass, half-bone nut for perfect balance of highs and lows.
- Multi-radius Prestige neck is an exact digital rendering of John's favorite neck.

J S M

The JSM100 builds on the foundation of the old AS200 with all-new features such as a Prestige neck and a side output jack that keeps the cord out of the way and leaves the top's structural and tonal integrity uncompromised. Not only that, as per John's request, we returned to the original 1970's AS/AR headstock design for that decidedly "classic" look.

JSM100VT

P M

If you respect traditional jazz, but find yourself drawn to newer styles, you should consider one of Pat Metheny's signature models. With a maple back and sides and humbucking pickups, the PM models have all the hallmarks of the traditional jazz box. They're just not boxy. PM guitars are slimmer and they're also double cutaway. The neck joins the body at the 17th fret instead of the traditional 14th so your fingers and the ideas that flow through them can travel beyond the borders of the traditional jazz guitar. Best of all, you can return home to traditional sounds and styles anytime and your more conservative listeners will never suspect where you've been.

STANDOUT STUFF — PAT METHENY MODELS

- Like the artist who inspired them, they're firmly rooted in the jazz guitar tradition, but able to go far beyond.
- Large, full hollow design but slimmer for better comfort, projection and feedback rejection.
- Double cutaway with 17th fret neck body joint for easier upper fret access.
- Prestige treatment neck and fingerboard finish.

AS series

Although Ibanez is known for being "anything but traditional" when it comes to jazz guitars, Ibanez can be strictly traditional.

The Ibanez AS models are designed for jazz. Featuring maple soundblocks for increased natural sustain and the warm Super 58

pickups, it's no wonder that the Ibanez AS is the first choice of many of today's jazz guitarists.

BASSES

Prestige

Bass players know what they want in a bass. Maybe it's simply intuition, maybe it's finding the right specs and maybe it's just a matter of picking up the right bass. The Ibanez R&D team took some of the same concepts that were applied to the Prestige line of guitars and also asked bass players how they wanted their basses to play and feel. They then came up with a line of Prestige basses that we're comfortable putting up against any boutique bass out there.

All Prestige basses feature specially treated necks and fingerboards

For 2003, Ibanez is very proud to equip our Prestige models with custom made pickups and EQ's by Bartolini®, one of the most respected names in bass electronics. The passive humbucking pickups, which were customized for each model, provide warm and deep tones while retaining solid treble emphasis. The Bartolini® active 3 Band EQ for BTB features fully independent bass, treble and mid controls with a wide boost/cut range. The EQ also includes a mini-switch for quick mid-frequency selections of 250Hz, 500Hz and 1kHz. A trim pot in the control cavity allows output gain adjustment.

STANDOUT STUFF — PRESTIGE BASSES

- Mono Rail bridge system for the SR (with D-tuner on the SR3000E).
- MR2 bridge for the BTB.
- Elixir® strings as standard.
- High quality, hand selected materials.
- Bartolini® pickups for all Prestige Basses.
- Bartolini® EQ's for Prestige BTB.

The Prestige Bass Line

For 2003, Ibanez is very proud to equip our Prestige models with custom-made pickups by Bartolini®, one of the most respected names in bass electronics.

The passive humbucking pickups, which were designed specifically for the Ibanez Prestige basses, provide warm and deep tones while retaining solid treble emphasis.

DWB

What do you need when you're a first call New York City session artist who's played with everybody from Living Colour, to the Rolling Stones to rapper Mos Def? You need a bass that stays comfortable during long hours of playing, and most of all, you need versatility.

Doug Wimbish's new signature model is the most radically contoured SRX bass we've ever made. The new DWB model is contoured only with ergonomics in mind, so nothing will ever get in the way of Doug's formidable technique. With neck-thru construction, light ash wings, and a custom 2-band EQ (EQB-DW II), Doug can go from gig to gig with just this one bass.

Hipshot® machine heads

STANDOUT STUFF — DOUG WIMBISH MODEL

- Extreme versatility combined with supreme comfort.
- Powerful 2-band active EQ offers both simplicity and wide tonal range.
- EMG® 35P4 and 35J pickups.

GWB

A respected player and instructor, Gary Willis' absolute mastery of the fretless is well documented in countless recordings with Tribal Tech, Wayne Shorter, Allan Holdsworth, Hubert Laws, Joe DiOrio and Gary's own solo albums. His signature fretless was the result of years of work with the Ibanez Research and Design Studio in North Hollywood, CA. If you're a pro bassist who demands complete dynamic and tonal control without any unnecessary bells and whistles, the GWB is just the right lean, no frills machine.

- Lightweight swamp ash body provides an extremely open sound.
- Curved Bartolini Willis pickup features separate coils for precise string balance.
- Prestige treatment neck and fingerboard finish.

K5

When you're talking heavy rock loaded with low end, you've got to give the nod to Korn. And there at the very low end of Korn's signature low end is Fieldy. To pay homage to Fieldy's contributions to heavy rock in general and heavy bass playing specifically, Ibanez is very proud to present the new K5 Fieldy Signature 5-String Bass. The K5 features the very fast Soundgear neck (emblazoned with a special K5 12th fret inlay) on a body of sandwiched padauk and mahogany.

With ADX active pickups and the original Vari-Mid 3-band EQ, the K5 is capable of generating any kind of sound including Fieldy's massive, no-midrange heavy tone (because as Fieldy says, "take the midrange and turn that \$%^&* off").

K5

- K5 neck
- Padauk top/Mahogany /Paduk back body

SRX series

If Soundgear basses are the virtuoso studio sophisticates of the bass world, the new SRX Soundgear Xtreme basses are the barroom brawlers. So if you want a bass that allows you to control every nuance of tone, please turn to the SR Soundgear section on pages 42 thru 43. But if you're looking for a bass that pumps out loud, heavy rock and has simple controls that make it easy to do, stay right here. The new SRX Soundgear Xtreme Series features three styles, all of which are capable of registering high numbers on the Richter scale. The professional SRX500 models feature a flamed maple top on basswood body equipped with ceramic magnet pickup and the Accu-Cast B205/205 bridges.

And at the top of the bottom is the Deluxe SRX700, which comes loaded with Alnico magnet pickups and a neck-thru ash body for easier access, and more sustain. Loud never sounded better.

SR series

Sleek, sexy and sonically versatile are some common descriptions of the narrow necked Soundgear basses. This explains why Soundgear basses are standard equipment in every kind of music from gospel to goth. But there are other reasons, including constant improvement at every level of the lineup.

And if you've wanted the added low-end of a low B string - or you already have one but never felt comfortable with the additional neck girth - consider the incomparable virtues of a Soundgear 5-string. Ibanez Soundgears are fitted with the thinnest neck of any 5-string anywhere. And while the necks and nuts are narrow, the selection of Soundgear 5-strings is as wide as it gets - everything from low-price to high Prestige and everything in between.

GSR series

Must a limited budget condemn you to the dreary looks and lifeless tones of a "beginner bass?" Not if you go with a GSR. GSR Soundgear basses have the commanding tones and comfortable playability that will please the pro at prices that go easy on the wallet. With GSR you get the looks, tone and comfort - and the same rigorous setup and inspection - as our most expensive models.

B10, B15 bridges produce the warm sustain that most bass players covet. As with the B100, string height adjustment couldn't be any easier.

BTB series

The BTB Series was designed to provide the more traditional pro bassist with all the desired features and sound of a "boutique bass". We simply omitted the undesirable boutique bass price tag. As befits a more traditional minded bass, the pickups are passive; the body is fuller and the neck is substantial. These features contribute to the BTB's rich tone and sustain. The BTB405 and 406 models feature an extra long 35-inch neck scale. With the extra string length, the tension is nice and tight; there's no flopping in the low end and the high strings ring through and sustain better. New for 2003, there is also a regular 34-inch scale neck BTB300 for a more "old school" feel. But while the concept of the BTB is traditional, the appointments are not. BTB basses feature Neutrik® locking jacks and Mono Rail bridges which isolate each string so they vibrate without interference.

BTB basses are traditional in style, but they abound with high tech features such as Neutrik® locking jacks and Ibanez MR-2 bridges.

Newly designed Ibanez SPJ J-type pickup with EQB-II 8 2-band equalizer (BTB300.)

EDC series

Every facet of the EDC's space age form is there to facilitate very down-to-earth functions. Contained within its ultra-modern curves are a built-in thumb-rest, a scooped out area to make it easier to get under the strings, and a raised area for the controls so you don't have to lean over to check settings (now that's thoughtful). The EDC's extra-long horn balances the bass so you don't have to. New for this year, the EDC features a custom triple coil pickup with coil selector and a newly designed EQB-II A 2-band equalizer. These new electronics provide a punchy bottom end with a highly tunable midrange, which will allow you to keep the groove in a deep pocket or rock right out of this world.

STANDOUT STUFF - EDA BASSES

- The ultimate Ergodyne. Futuristic Luthite body offers unprecedented comfort and balance.
- Combination of magnetic and piezo pickups provides warmth without distortion, even at high volumes.
- Low profile bridge and wider neck provide optimum spacing for right and left hand fingering.

EDA series

The EDA doesn't look much like a traditional bass, does it? With piezos as well as a magnetic pickup, the EDA doesn't always sound like a traditional bass either - although it can produce that traditional sound quite easily. The EDA is simply able to do more than a traditional bass. And more is what it's all about. Because today's bassist is often called on to do more than the just the traditional thing. Regardless of the gig, the EDA is more than up to the challenge.

STANDOUT STUFF - EDB BASSES

- Resonant Luthite bodies offer ergonomic comfort and dynamic tone.
- Strong, slender two-octave maple necks offer fast and easy fretwork.
- Passive pickups and active EQ's are specifically selected to enhance the resonant Luthite material.

EDB series

On EDB models, the Luthite body material enhances the top end while high output humbuckers enhance the middle and bottom.

The EDB is the most traditional in appearance of the Ergodyne basses, but still features a radically curved back for comfort and a scooped front for slapping.

B10 bridge produces the warm sustain that most bass players covet. As with the B100, string height adjustment couldn't be any easier.

ATK series

Over the years, the ATK bass has become a staple in the worlds of funk and rock. The triple coil pickup provides bassists with that punchy bottom end and highly tunable midrange that's required in much of today's music. With the addition of a single coil neck pickup and a 5-way switch, the ATK has also become one of the most versatile basses available. Additionally, all ATK basses come with a 24-fret neck and a slightly smaller body to accommodate a wider range of playing styles.

Tone Blaster

If volume is your thing, this is the amp for you!

For the first time, Ibanez introduces some serious amplification for serious tone and volume. The Tone Blaster 100 series features a true 100 watt amp in both stack and combo configurations. In the past, tubes were the thing, but for true modern crunch and those "in your face" lead tones, the Tone Blaster 100 series solid-state circuitry brings home the goods. Not only that, you won't have to concern yourself with replacing expensive tubes, worrying about maintaining worn out parts or dealing with your sound changing from one day to the next. With the Tone Blaster 100 series, you just plug in and play.

TB412A and TB412S speaker cabinets are designed to be used in either mono or stereo operation.

Tone Blaster

There are already plenty of electric guitar amps dedicated to recreating yesterday. Ibanez guitar amps are a different animal. Ibanez amps are voiced for today's tones. This is why Ibanez—the newest name in amps — is also the fastest growing name in amps.

Sound Wave

The Sound Wave bass amps have the clarity and booming lows of the big rigs and easily handle passive or active basses. And with the new Sound Wave 35 and 65 watt tilt-back models, Ibanez now has bass amps suitable for small venue performance.

The RCA type CD INPUT jacks are provided for playing along with music from a CD or cassette player, or other external sound source.

All Sound Wave bass amps are equipped with tweeters. The SW65 comes equipped with a piezo type tweeter. The SW35 and the SW20 are equipped with coaxial type tweeters.

TONE-LOK

EFFECTS PEDALS

On the outside, Tone-Lok effects are equipped with our exclusive "set and forget" Push-Lok rotary pots. Push the knobs down and your tone settings lock securely inside the case. No more lost settings or knobs broken by club-footed club owners staggering about the stage.

On the inside, Tone-Lok pedals feature hi-fidelity components carefully tweaked with the constant input from a new generation of Ibanez players. And all this great stuff comes encased in cool looking, road tough metal boxes at prices the working player can afford.

TS7

The Tubecreamer isn't just a stompbox, it's an institution. Our latest generation Tubecreamer, the TS7, is no exception. With the Tubecreamer's classic subtle-but-smooth overdrive, the TS7 expands the expressiveness of your guitar while maintaining its tonal integrity. Tone adjustments are provided by the classic three-knob configuration with an added "hot" switch for an extra gain boost.

DS7

The most versatile Ibanez distortion pedal ever, the DS7 is capable of producing a wide range of smooth, dynamic overdrive tones. From a subtle tonal nudge to walloping rock n'roll crunch, the DS7 delivers days of sustain and gobs of gain.

LF7

The first dedicated filter pedal for the guitar, the LF7's voltage controlled analog High and Low pass filters allow you to emulate transistor radio and megaphone type sounds. Best used at the end of a signal chain in combination with other pedals, let this ticking time bomb help you create. The Lo-Fi also performs equally well with vocals, drum machines or in any "mix-down" context.

CF7

The CF7 creates shimmering soundscapes, whooshing jet plane sounds, and contemporary "Korny" chirps and blurbs. The schizo "KRAZY" switch lets the CF7 be a conservative Dr. Jekyll with the "NORMAL" mode (classic chorus and flanger). Or you can turn the pedal into the proverbial Mr. Hyde...the "WHACKO" mode imitates the contemporary modulation sounds used by today's phattest rock bands. It's like getting two pedals in

PD7

Why let guitarists rule the stage? Loaded with growling low-end distortion, the PD7 levels the playing field for the rock bassist. The PD7 is armed with three pre-amp style voicings and an attack control switch, which accents the amount of harmonic content in your sound. With DRIVE, LO, HI, and LEVEL knobs, dialing in a thunderous bass sound has never been easier.

SB7

If you're looking for new tones or you're still smoldering with resentment against synth bass keyboard players who took our gigs in the 80's, the SB7 is the ticket. You've got real time feel -- in other words no annoying tracking errors and delays. You can even play chords. Then there's a funky auto-wah (think "These from Shaft"), an 80's style synth bass sound (now it's our turn to take THEIR gig) and a deep and heavy synth bass. And although we know it's oh-so-very-cheap to talk price when we're talking art, before you shell out your hard earned buck on a bass synth effect, check the price of ours vs. "the other guy's." H'mmm.

SM7

The Smashbox is the most aggressive weapon in the Tone-Lok distortion arsenal. Armed with obscene amounts of gain, tight low end, and searing highs, the Smashbox is the heavy rock sound for the contemporary guitarist.

SH7

Designed specifically for 7-string guitars with the input from some of Ibanez's hottest 7-string players, the SH7 Seventh Heaven distortion pedal accentuates the low-end girth of the 7-string while reducing unwanted string noise. A special mode switch allows you to choose between two different distortion voicings while Lo, Hi, Drive, and Level knobs give you total tone control. An absolute must-have effect for replicating the best 7-string sounds of others or creating your own individual tones.

FZ7

Far out! A complete 60's flashback with none of the drawbacks, the FZ7 is the ultimate in psychedelic fuzz. With the FZ7's tone, drive, and level controls, it's never been easier to get the right retro tones. You can even engage the DAMAGE switch for that ratty, broken speaker sound. Yeah, baby, yeah!! Dial in, tune up, drop down or whatever turns you on.

PH7

Designed to emulate the effect of a rotating speaker, the PH7 has a switchable phase circuit capable of either four or eight stages of smooth phasing. With these two very different tonal modes, you can go from a subtle shimmer to an all out 70's "Let's Get Funky" phasing.

PM7

If you've gone through one phase after another, maybe it's time for the final phase. The PM7 Phase Modulator offers three types of waveforms to give you everything from classic phaser to DJ effects to toy ray gun sounds. Since good things come in threes, the PM7 also has three phase stages: vintage, deep and dry, and deep and pronounced. With some minor tweaking, the PM7 goes from traditional to 21st century and beyond.

DE7

Add new dimensions to your sound with the DE7 Delay/Echo pedal. Get the best of both worlds: high tech digital sounds comparable to expensive rack units or warm vintage tape echo sounds - all with a simple flick of the switch. TIME, REPEAT and LEVEL controls help you dial in just the right amount of delay, while stereo outputs can be used for a more spacious sound. With a range of 30ms to 2.6 seconds, the DE7 is the only sound solution for every playing situation.

AW7

There are autowahs. And there are autowahs. But the Tone-Lok AW7 isn't just any autowah. It's got standard wah where both the highs and lows are cut and it's got a wah setting where the only highs are cut. And it's got distortion. A band pass filter provides the sound of a standard wah pedal left at one setting (a favorite wah pedal technique of Joe Satriani). You can even change the chain order of the effects to get different tones: either distortion to wah or wah to distortion.

TRAA
P.O.D.

MICHAEL WARD

Tube Screamer

What can be said about the TS9 that hasn't already been said. It is the standard overdrive that all others are judged against. The TS9 features all the same hand wired analog circuitry that it has always had, creating the familiar Tube Screamer drive and sustain.

The TS9DX also offers three new settings for increased low-end crunch: +, Hot, and Turbo, all of which maintain the original TS9 tonal integrity.

Ibanez Noiseless Cables

So, you have a great sounding guitar and a cool vintage amplifier to plug into. But have you thought about the cables you're using to plug the two together? True tone connoisseurs know that guitar cables are an important link in the tone chain. With Ibanez' new Noiseless Cables, the sound that your guitar produces is sent to the amplifier with little to no additional noise or unwanted coloration. Another cool feature is the color-coded stickers that come with each cable – because when you're in the heat of the battle on stage, the last thing you want to deal with is figuring out which cable goes where. Ibanez Noiseless cables come in all the popular lengths with your choice of straight, angled ends, or a combination of the two.

MODEL NO.	NAME	RECOMM. POSITION	CONSTRUCTION	MAGNET	DESCRIPTION KEY RECOMMENDED POSITION: (B) BRIDGE, (M) MIDDLE, (N) NECK CONSTRUCTION: (H) HUMBUCKER, (S) SINGLE COIL (BASS ONLY): (A) ACTIVE, (P) PASSIVE (AL) ALNICO, (C) CERAMIC
IBANEZ GUITAR PICKUPS					
AH1	AXIS HUMBUCKER 1	N	H	C	Very responsive and full sounding; medium output with lots of character. Excellent for chording.
AH2	AXIS HUMBUCKER 2	B	H	AL	Full tone sound. Alnico-5 magnet provides excellent clarity in harmonics and individual notes.
AH3	AXIS HUMBUCKER 3	N	H	C	Responsive full sounding pickup with added output.
AS1	AXIS SINGLE 1	M	S	AL	Traditional sounding single coil with Alnico-5 polepieces. Complements Axis humbuckers.
AS2	AXIS SINGLE 2	M	S	C	Traditional sounding single coil pickup with increased output.
GB SPECIAL	GB SPECIAL	B	H	AL	Floating pickup co-designed by George Borgan for hollow bodies at higher volumes. Warm, well rounded output with less feedback.
GB SPECIAL	GB SPECIAL	N	H	AL	Neck version of above.
INF1	INFINITY 1	N	H	C	Versatile and responsive with warm classic tone and added output.
INF2	INFINITY 2	B	H	AL	Enhanced midrange output. Alnico-5 magnet for individual string clarity. Excellent dynamics.
PSND2	POWERSOUND	B	H	C	High output with enhanced harmonics.
PSND5	POWERSOUND	M/N	S	AL	High output with complete clarity.
PSND1	POWERSOUND	N	H	C	High output in the neck position with no "muddiness."
QM1	QUANTUM 1	N	H	C	Medium output with full clarity. Complements S-series body.
QM2	QUANTUM 2	B	H	C	Higher output and enhanced harmonics for tight, even tone with slightly less high-end.
QMS1	QUANTUM SINGLE 1	M	S	AL	Utilizes Alnico-5 pole pieces for even string output. Complements Quantum humbuckers.
S1	SINGLE 1	M/N	S	AL	Traditional sounding, but high output single coil with Alnico-5 polepieces for even string output. Designed to work with humbuckers in the split position.
SS8	SUPER 58	A11	H	AL	Classic, warm and versatile. Handles both jazz and rock without feedback.
V1	VINTAGE 1	N	H	AL	Slightly overwound for beefy, traditional rhythm sound.
V2	VINTAGE 2	B	H	AL	Even toned with tight leads, smooth tapetal and added sustain.
V7	VINTAGE 7	N	H	C	Tight, but bright. Very dynamic for chording and rhythm.
V8	VINTAGE 8	B	H	AL	Warm yet articulate lead pickup with enhanced overtones. Good harmonics without excessive brightness.
V77	VINTAGE 77	N	H	C	Severestring version of V7 pickup.
V87	VINTAGE 87	B	H	C	Severestring version of V8 pickup.
AH17	AXIS SEVEN 1	N	H	C	Severestring version of AH1 pickup.
AH27	AXIS SEVEN 2	B	H	C	Severestring version of AH2 pickup.
IBANEZ BASS PICKUPS					
ADX5	ACTIVE DYNAMIX 5	B/N	H/A	C	Quiet, dynamic, punchy sound on all 5 strings. Two different sized bobbers provide even string output. Individually calibrated for neck and bridge positions.
DX5	DYNAMIX 5	B/N	H/P	C	Two different sized bobbers provide even string output. Full range, positive bass sound with plenty of punch.
DX6	DYNAMIX 6	B/N	H/P	C	Same as DX5 for 6-string basses.
DXJ	DYNAMIX J	B	H/P	C	Designed to be used with or without an eq system for tight high-end.
DXP	DYNAMIX P	N	H/P	C	Designed to be used with or without an eq system for more punch in the neck position.
PSNDJ	POWERSOUND J	B	S/P	C	High output with added highs.
PSNDP	POWERSOUND P	N	H/P	C	High output with plenty of punch.
DXP-M6	DYNAMIX M6	B/N	H/P	C	High output passive pickup with quick attack and superior dynamics.
DFR	DYNAMIX FULL RANGE	B/N	H/P	C	Medium output passive pickup with quick attack and superior dynamics.
DXHM	ERGO-DYNAMIX	B/N	H/P	C	Powerful with good midrange punch. Designed specifically to work with the lightweight material of Ergo-style bodies.
PFR-AL	PASSIVE FULL RANGE	B/N	H/P	AL	Powerful Alnico magnet pickup with exceptional clarity and very even response.
PFR-4	PASSIVE FULL RANGE	B/N	H/P	C	Powerful full range pickup with added low mids.
PFR-5	PASSIVE FULL RANGE	B/N	H/P	C	Powerful full range pickup with added low mids.
BARTOLINI® BASS PICKUPS (INDIVIDUAL BARTOLINI PICKUPS ARE NOT SOLD BY IBANEZ)					
GW8	BARTOLINI WILLIS	B	H/P		Features separate coils for each string to allow more precise string-to-string volume.
SR BASS	BARTOLINI CUSTOM	B/N	H/P		Humbucking passive seapole pickup. Excellent clarity with well balanced tonal response.
BTB BASS	BARTOLINI CUSTOM	B/N	H/P		Humbucking passive seapole pickup especially designed for 35 inch scale BTB basses. Enhanced low end, warm and deep wailing.
DIMARZIO® GUITAR PICKUPS (INDIVIDUAL DIMARZIO PICKUPS ARE NOT SOLD BY IBANEZ)					
DP151	PAF-PRO™	B/N	H	AL	Classic humbucking sound with added presence, output and clarity.
DP153	FRED®	B	H	AL	Strong mids and a wide range of harmonics and overtones. Designed for Joe Satriani.
DP155	TONE ZONE™	B	H	AL	Very big, warm tone with good overtones and harmonics.
DP158	EVOLUTION	N	H	C	Calibrated to DP159, for punchy and loud. Designed for Steve Vai.
DP759	PAF-7™	B/N	H	C	Dimarzio PAF 7 A, clear-sounding, lower-output pickup that performs like the classic humbuckers of the late '50s.
DPS1	EVOLUTION	N	S	C	Bright, clean tone.
DP159	EVOLUTION	B	H	C	Tight, aggressive and louder. Wide range of overtones.
DP700	BLAZE	N	H	C	Medium power, warm, clear tone.
DP701	BLAZE	M	S	C	Bright, clean tone.
DP702	BLAZE	B	H	C	High power, punchy bass and treble, clean mids.
DP165	BREED	N	H	AL	Designed for Steve Vai. Classic 50's smooth and fluid humbucking tone. Hotter than a PAF-PRO, but not as hot as an Evolution.
N/A	CUSTOM SINGLE	M	S	AL	EMG exclusive. Classic single coil tone. Calibrated for perfect balance with fixed humbuckers.
DP166	BREED	B	H	AL	Bridge version of the DP165.
